SUMMARY

An engineer who is young, talented, creative, passionate in working and always put effort into self-improving knowledges and skills in IT field. Be able to self-study new technologies fast and eager for new challenges at work.

WORK EXPERIENCE

Viettel Cyber Security – Hanoi, Vietnam
Solution Engineer *Mar 2020 – Present*

- Key member of research and development (R&D) team at Viettel Cyber Security.
- Research, develop and directly contribute more features needed to the Harbor project (an open source trusted cloud native registry).
    - Research on The Update Framework (TUF) with Notary.
    - Adding the file repository feature (support upload trusted files), license authentication (authenticating users through a centralized license system of the company), etc…
    - Build tools used internally by the company such as license scanner tool, upload trusted files (jetty), repository backup tool for Harbor.
    - Technicals and technologies have used: Golang, Angular, Python, Notary, Docker.
- Research Git, Github, Git Release flow models; build CI/CD process with those models and give appropriate model to project teams.
- Research service discovery, service mesh, configuration as code solutions with Consul; secret management with Vault.
- Research and evaluate the orchestration container model with Kubernetes, Docker Swarm, Hashicorp Nomad and propose a suitable model for the company.
- Directly implementing Nomad and Consul technology for the SIEM - Security Information and Event Management system (the company's biggest project with more than 80 services in the system).
- Research and evaluate performance for Traefik and Envoy (Reverse Proxy and Load Balancer solution) applied for SIEM system.
- Research on cloud-native application, microservice architecture, DevSecOps CI/CD process.
- Organize internal seminars to share experiences and guidance on applying technologies (Nomad, Consul, Traefik, Envoy, Jenkins CI/CD with git-flow) for project team members.
- Excellent employee achievement October 2020, January 2021.

HomoHouse (Capstone Project at FPT University) – Hanoi, Vietnam
Technical Leader *Aug 2019 – Dec 2019*

- The leader of the capstone project has 5 members (1 BA, 4 Developer) with Iterative Incremental model.
- Receive requests from BA, research and analyze requests with team members. Write detailed design documents and implement 4 projects.
    - Building workflow for team members, solutions for architecture, and infrastructure of projects.
    - Train team members to use some technology for the project such as NodeJs, ReactJs, Docker, Docker Compose.
    - Design and build systems using microservices architecture with GKE (Google Kubernetes Engine).
    - Integrated testing and automated deployment using container docker with GKE, Gitlab CI for all 4 projects.
    - Design and implement data analysis tools and room search tools using Elasticsearch.
    - Directly implement the project's main functions such as search engine, upload a room, real-time messaging, data analysis (admin side), notification system, etc...

Fingroup – Hanoi, Vietnam
Interns *Jul 2018 – Jan 2019*

- Receive requests from PO, research, and analyze requests with team members. Write detailed design documents and analyze scenarios with testers then implement two company's projects.

    - Design and implement 2 projects using ReactJS with Atomic Design architecture.
    - Real-time synchronization of ports with a number of over 10,000 records.
    - Build real-time chat using Firebase Services.
- Technicals and technologies have used: Javascript, ReactJS, Docker, Firebase Services, Google APIs.

VNEXT Software Company
Designer (Free-Lancer) *Jan 2017 – Dec 2017*

- Video Editing, Printed design, Web design.

EDUCATION

FPT University – Hanoi, Vietnam *Oct 2015 – Dec 2019*
Graduated, Software Engineering

- Achieved the student activities excellent movement (for 4 years at FPT University).
- Achieved the high score with (9.0/10) in the Information System major at the 2019 graduation thesis.
- Achieved excellent students in the spring semester of 2019.
- Achieved the first prize in the FPT University's MV Contest 2016.

Techkids - Coding School – Hanoi, Vietnam *Feb 2018 – May 2018*
Full Stack Web course

- Achieved the first prize in the Hackathon TechKids (Web Full Stack Gen 11).

ACTIVITIES

FPT University

- Member of the organizing committee of major events in the school: Fcamp (3 seasons), FPTU Talent Show 5, Water Day 2017 (Media Leaders), Color Trip (volunteer program), etc...
- Color Team - soft skills group, specializing in organizing events and games at FPT University.
- FU Photography - photography club at FPT University.

Tech Blog

- Contribute articles about technology on Medium.
- Share my tech experiences with Nomad, Docker, Kubernetes, AWS, Google Cloud, etc…

ADDITIONAL

Skills: self-study, presentation design (PowerPoint).
Languages & Technical: Javascript, Golang, NodeJs, ReactJs, Docker, Kubernetes, Nomad, Consul, Gitlab CI, Envoy, Traefik, Jenkins CI/CD.
Certifications & Training:

- TOEIC certificate with score 600 (2020)
- Summit 2 English Certification by FPT University
- Completed full stack web course by Techkids School
- Application System Security training course, Infrastructure Security Course by Viettel Academy
- Complete many DevOps courses on Udemy (sponsored by Viettel)
