SUMMARY

An engineer who young, talented, creative, passionate in working, always effort to self-improving. Extensive experience in developing high-performance Microservices systems using NodeJS, Golang with Docker, Kubernetes Engine and Cloud Services. Experience in building and using build/deploy tools for CI/CD.

WORK EXPERIENCE

Viettel Cyber Security – Hanoi, Vietnam
Solution Development Engineer *Mar 2020 – Present*

HomoHouse (Capstone Project at FPT University) – Hanoi, Vietnam
Technical Leader *Aug 2019 – Dec 2019*

- The leader of the capstone project has 5 members (1 BA, 4 Developer) with Iterative Incremental model.
- Receive requests from BA, research and analyze requests with team members. Write detailed design documents and implement 4 projects.
  - Building workflow for team members, solutions for architecture and infrastructure of projects.
  - Train team members to use some technology for the project such as NodeJs, ReactJs, Docker, Docker Compose.
  - Design and build systems using microservices architecture with GKE (Google Kubernetes Engine).
  - Integrated testing and automated deployment using container docker with GKE, Gitlab CI for all 4 projects.
  - Design and implement data analysis tools and room search tools using Elasticsearch.
  - Directly implement the main functions of the project such as search engine, upload a room, real-time messaging, data analysis (admin side), notification system,...

Fingroup – Hanoi, Vietnam
Interns *Jul 2018 – Jan 2019*

- Receive requests from PO, research and analyze requests with team members. Write detailed design documents and analyze scenarios with testers then implement two company's projects.
  - Design and implement 2 projects using ReactJS with Atomic Design architecture.
  - Real-time synchronization of ports with a number of over 10,000 records.
  - Build real-time chat using Firebase Services.
- Technicals and technologies have used: Javascript, ReactJS, Docker, Firebase Services, Google APIs.

V-next Software Company
Designer (Free-Lancer) *Jan 2017 – Dec 2017*

- Video Editing, Printed design, Web design.

PROJECT

- **Doublet** (2019): Solving warehouse management problem and sales invoice for salons in Nam Dinh province.
  - Languages: NodeJs, ReactJs.
  - Design and implement serverless architecture for projects using Serverless Framework, AWS Lambda, AWS API Gateway, AWS Cognito.
  - Build web, mobile apps using ReactJS and React Native.
- **Merge Sort & Floating Point Number Operations Simulation** (2019): Final project in Software Architecture and Design course uses Java Swing language.
  - Help people better understand merge sort algorithm and floating point number operations.
  - Users can enter data to perform the simulation.
- **Pomodoro Timer** (2018): Product in techkid hackathon with a team size 4 members won the first prize in the competition.
  - Web application products help people focus when working.
  - Users can enter to do list to focus more on completing the goal.

- **Chatbox** (2018): A chat application similar to messenger, users can create group chats with multiple people and join group chats with room codes.
  - Technicals and technologies have used: NodeJs, ReactJs, MongoDB, Docker, Firebase.
  - Developed on 2 platforms: Web and Mobile (Android).
- **Color App Extensions** (2018): Chrome extension helps leader manage team members and people can send real-time messages in each event group.
  - Languages: NodeJs, ReactJs.
  - Used Firebase for real-time chat and store images in a chat group
  - Used Heroku and mLab to deploy app.
- **Book Share** (2017): Final project in Web-Based Java Applications course.
  - Web applications that help people can borrow each other's books for a given period.
  - Implement in 2 versions with 2 different languages: Java & C#.

EDUCATION

FPT University – Hanoi, Vietnam *Oct 2015 – Dec 2019*

Graduated, Software Engineering, Grade 7.1/10

- Achieved the high score with (9.0/10) in the Information System major at graduation thesis of the semester Fall 2019.
- Achieved the first prize in the FPT University's MV Contest 2016.

Techkids - Coding School – Hanoi, Vietnam *Feb 2018 – May 2018*

Full Stack Web course.

- Achieved the first prize in the Hackathon TechKids (Web Full Stack Gen 11)

ACTIVITIES

FPT University

- **Member of the organizing committee of major events in the school**: Fcamp (3 seasons), FPTU Talent Show 5, Water Day 2017 (Media Leaders), Color Trip (volunteer program),...
- **Color Team**: Soft skills group, specializing in organizing events and games at FPT University.
- **FU Photography**: Photography club at FPT University.

Tech Blog

- Contribute articles about technology on medium.
- Share my tech experiences with NodeJS, ReactJS, Docker, Kubernetes, AWS…

ADDITIONAL

Languages & Technical: Javascript (proficient), Golang, NodeJs, ReactJs, Docker, Kubernetes, Gitlab CI.
Certifications & Training: Completed Full Stack Web course, Completed Academic Preparatory English level 6, Student Activities Excellent Movement.
Skills: presentation design (PowerPoint) as well, Video editing.
